Skills Measured

Table of Contents

Skills Measured

1. Describe Artificial Intelligence workloads and considerations (15–20%)
- Identify features of common AI workloads
  • Identify computer vision workloads
  • Identify natural language processing workloads
  • Identify document processing workloads
  • Identify features of generative AI workloads
- Identify guiding principles for responsible AI
  • Describe considerations for fairness in an AI solution
  • Describe considerations for reliability and safety in an AI solution
  • Describe considerations for privacy and security in an AI solution
  • Describe considerations for inclusiveness in an AI solution
  • Describe considerations for transparency in an AI solution
  • Describe considerations for accountability in an AI solution

2. Describe fundamental principles of machine learning on Azure (15–20%)
- Identify common machine learning techniques
  • Identify regression machine learning scenarios
  • Identify classification machine learning scenarios
  • Identify clustering machine learning scenarios
  • Identify features of deep learning techniques
  • Identify features of the Transformer architecture
- Describe core machine learning concepts
  • Identify features and labels in a dataset for machine learning
  • Describe how training and validation datasets are used in machine learning
- Describe Azure Machine Learning capabilities
  • Describe capabilities of automated machine learning
  • Describe data and compute services for data science and machine learning
  • Describe model management and deployment capabilities in Azure Machine Learning

3. Describe features of computer vision workloads on Azure (15–20%)
- Identify common types of computer vision solutions
  • Identify features of image classification solutions
  • Identify features of object detection solutions
  • Identify features of optical character recognition solutions
  • Identify features of facial detection and facial analysis solutions
- Identify Azure tools and services for computer vision tasks
  • Describe capabilities of the Azure AI Vision service
  • Describe capabilities of the Azure AI Face detection service

4. Describe features of Natural Language Processing (NLP) workloads on Azure (15–20%)
- Identify features of common NLP workload scenarios
  • Identify features and uses for key phrase extraction
  • Identify features and uses for entity recognition
  • Identify features and uses for sentiment analysis
  • Identify features and uses for language modeling
  • Identify features and uses for speech recognition and synthesis
  • Identify features and uses for translation

- Identify Azure tools and services for NLP workloads
  • Describe capabilities of the Azure AI Language service
  • Describe capabilities of the Azure AI Speech service

5. Describe features of generative AI workloads on Azure (20–25%)
- Identify features of generative AI solutions
  • Identify features of generative AI models
  • Identify common scenarios for generative AI
  • Identify responsible AI considerations for generative AI
- Identify generative AI services and capabilities in Microsoft Azure
  • Describe features and capabilities of Azure AI Foundry
  • Describe features and capabilities of Azure OpenAI Service
  • Describe features and capabilities of Azure AI Foundry Model Catalog
